

C Spire gives Mississippi schools free wireless data access to approved learning sites

C Spire is working with Mississippi schools to provide free wireless data access to 44 approved learning websites for Mississippi K-12 students as they prep to continue their studies from home.

That means students' use of these websites won't count against their data use in their wireless plan.

C Spire worked with sources that surveyed most of the state's 151 school districts to identify, develop and test the approved learning sites for mobile broadband internet accessibility. The list features some of the most popular and widely available K-12 online learning sites in public education circles.

Approved learning sites:
